Summary

I am a dedicated and enthusiastic final-year **B.Tech [Information Technology](#)** student at Hindusthan College of Engineering and Technology with a current CGPA of **7.42**. I completed my Higher Secondary education with **80%** and SSLC from Brilliant Matric Higher Secondary School. Throughout my academic journey, I have developed a strong interest in technology, software development, and problem-solving. I am eager to apply my technical knowledge, continuously learn new skills, and contribute effectively to an organization while building a successful career in the IT industry.

Skills

language python java	Web development css HTML javascript	data base Mysql MangoDB
others prompt engg. generative ai UI/UX design		

Languages

Tamil

English

Certificates

Cyber security jul-oct 2025	Cloud Computing jul-oct 2025	Generative Ai for all jan 31 2026
Prompt engineering jan 30 2026	MongoDB basics jun 13 2025	Vector search fundamental jun 18 2025
Building RAG apps using MongoDB jun 18 2025	Tranforming Higher Education With Google Gemini dec 04 2025	

Interests

- Full stack web development
 - Database management
- Artificial Intellige
 - data analysis
- Artificial intelligence
 - UI/UX designer

Projects

Softwarebased waste management
Zero Waste Management System

Developed a smart waste management platform to improve waste segregation, recycling, and disposal processes. Integrated an AI-powered chatbot for waste identification and disposal guidance using image analysis. Implemented worker monitoring and role assignment features to streamline waste collection operations. Developed a marketplace for buying and selling reusable waste materials, promoting recycling and sustainable waste management.

Key Features: AI-based waste identification, chatbot assistance, worker monitoring, role assignment, waste marketplace, and recycling recommendations.
